(allowed range = 3.0 to 8.5)
[REDACTED] Pharmacy. 20210803-09:25:59 09:26

Updates posted to custom web site

POWER ALERTER
Pharmacy
Long-term analysis
Hourly average refrigerator temperature
Hi-resolution analysis
30 readings per hour of refrigerator temperature
"Power Alerter" by Shopkeeper Solutions CC
Measurement details:
The temperature is read every minute. The hourly table is a report every hour of a 30-reading moving average. The high-resolution table is a report every 2-minutes of a 3-reading moving average.
Alert messages
If the 30-reading moving average dips below or rises above user-defined limits then alert message(s) are sent. The message includes the current 30-reading average as well as the lowest and highest 3-reading average since the previous temperature alert.
Alerts will also be sent for power outage. Up to approximately 4 hours of recording will continue during a power failure.
